

150Mbps Wireless LAN Broadband Router

Model No. SP916NL

Introduction

Micronet SP916NL, 11n Wireless Broadband Router, delivers next generation wireless solution of high speed and cost-efficient network. The router allows multiple wireless devices to share the single Internet connection via xDSL or Cable connection. The router is designed for client user, medium-sized business and enterprise to migrate to efficient and high performance wireless network. The router is compliant with IEEE 802.11n and backward compatible with IEEE 802.11b/g. The router supports MIMO (Multi-In, Multi-Out) technology, which uses 1T1R (1 transmitter, 1 receiver) to enhance data rate and wireless coverage. In addition, the scope of the network can be easily expanded by connecting the router to a hub or switch.

Key Features

- Include router, wireless access point, four-port switch and firewall in one
- "Setup Wizard" enables you to connect Internet without entering administration interface
- Comply with IEEE802.11n standard and IEEE802.11 b/g standards
- Increase 6 times coverage distance than 802.11g standard and reduces the dead spots in the coverage area
- Support transmitting rate up to 150Mbps
- Provide 64/128-bit WEP, WPA, WPA2, WPA&WPA2 encryption methods
- Support MAC address, IP address, URL filtering settings for network security
- Support One-key Wizard software to make router configuration easier
- Support WPS (Wi-Fi Protected Setting) to establish the connection between the wireless network clients and the device through encrypted contents
