

## USB to RS-232 Adapter

The USB to Serial Bridge Converter is a low-cost, high-performance device. It operates as a bridge and provides single and easy connectivity between one USB port and serial ports. Each serial port can be independently configured into various synchronous and asynchronous interfaces. Users will have option to execute serial devices at the same time. The is designed to be compliant with a variety of applications, including COM port replicate and other devices with serial ports. As such, is ideally suitable for many peripherals like cellular phone, digital camera, modem or Serial Mouse, PDA, GPS and etc.

### Features

- Full compliance with the USB Ver 2.0 & 1.1
- Supports the asynchronous serial interfaces.
- Over 230kbps transfer rate
- Supports remote wake-up and power management
- Windows : 98 / Me / 2000 / XP / Vista / 7 / 8 / 2003 / 2008R2, WinCE : V4.2~ V7.0,
- Mac OS : 8.x / 9.x / 10.x & Linux : Kernel 1.5.0 or above
- The system is equipped with USB Host Controller

### Specification

Model No.	UMC-201	
Chips	FTDI	
Compliant	USB Ver 2.0 & 1.1	
Connector	Upstream	USB Type A Male
	Device	DB-9 Male
Power Mode	Bus	
Cable Length	1.1m	
Housing	Molding (PVC)
