Getting to know PhotoKey

Software

KeyGuard App

Feature

Secure

The PhotoKey is the solution to keep your iPhone/iPad, and valuables that are attached to the keychain, close to you.

Alert

If you forget and leave your iPhone/iPad behind,

PhotoKey reminds you by vibrating and/or producing an alarm sound. Or, if PhotoKey is attached to your keys and you leave your keys behind, the iPhone/iPad will sound an alarm to alert you.

• **Last Location**

You can find your last device's location. When your last device disconnect with keychain, you can press location icon. Then you'll get your device's location.

• **Setting**

- Change PhotoKey name
- Buzzer ON/Off
- Valid distance control

• **Free APP Download**

- support iOS

• **Photo Capture Remote control**

- Capture on Photokey press & release.
- Camera front and back flip on PhotoKey hold for 1 second and release.

NOTE: This App requires iDevices that support Bluetooth 4.0 (iPhone 4S+, IpodTouch5+, iPad3+, iPad mini, iPhone5, iPad4)

"Continued use of GPS running in the background can dramatically decrease battery life."
