

RADIO MR-200

Professional Motorcycle FM Transceiver

Wired/Bluetooth

- Dual band design covering 136 ~ 175 and 400 ~ 520MHz Max.10W RF output power.
- Integrate Rider and Passenger intercom.
- AUX-in supported such as radar speed detector, GPS and MP3.
- Waterproof design.
- Waterproof and extensional control box.
- Main unit with compact and flat design for saving space.
- 70% space of the main unit with aluminum material for durable rigid use and better heat sink.
- External motorcycle uses dual-band antenna to improve communication range.
- High strength low loss antenna wire to reduce signal attenuation.
- Universal antenna base.
- Main unit with enforced noise-cancelling circuit design.

MR-200 Wired Version Features

- High strength wind noise-cancelling microphone.
- Dual speakers designed, allowed users to remove one for convenient application.
- Leading design of ultra-flat speakers to reduce un-comfortable feeling for wearing helmet.
- Independent control box for Driver wire package, conveniently adjust volume, power ON/OFF and PTT.
- Independent control box for Passenger wire package, conveniently adjust volume and PTT.

MR-200 Bluetooth Version Features

- Full function wireless support Include radio communications, intercom external audio input (such as GPS navigation, radar detection...).
- External installation is user friendly.
- Standard design, good compatibility with third-party Bluetooth headsets (ex: Uclear, SENA, Interphone...).

2016 Innovation Awards
The Silver Awards
