## PC Based DVR Solution

(Model No. DVR2008)

KGUARD® DVR has always been the best  
Now we're made it even better.

### Overview

KGuard DVR2008 is a complete advanced digital surveillance system, designed to meet the requirements of modern security. High compression rates and image quality, real-time video plus audio recording, and monitoring, make it a dependable first choice for professionals needing an all-in-one state of the art solution that is ready for continuous 24 hour a day operations in large networks with centralized control. KGuard DVR2008 integrates with CMS1000 PRO, CMS2000, Backup Center, Intelligent Video Surveillance and Point of sale (POS) via a network.
