Caution

(PS. The product is sold on condition except USA.)

End-of-life Battery Disposal Instructions. This device contains an internal, rechargeable battery (3.7V 4520mWh). In general, the life expectancy of such batteries is dependent upon their usage. Monthly only use will result in a shorter battery life. Casual use will extend battery life. If you suspect that the rechargeable battery inside your device has a low charge, try charging it. If the device does not recharge after several attempts, it is a non-rechargeable battery and should be replaced. The user should not replace the battery himself/herself but the local agent should be contacted. Be sure to procure your battery in accordance with the laws and regulations in your area that specify the proper disposal of non-rechargeable electronic devices. There are no such laws or regulations, please dispose of your device in a waste bin for spent electronic products.

The battery used in this device may present a risk of fire or chemical burn if misused. Do not disassemble, expose to heat above 170°C (340°F), incinerate, or immerse in water or liquid of any kind. Do not use or charge the battery if it appears to be leaking, discolored, deformed, or in any way abnormal. Do not leave your battery discharged or unused for extended periods of time. When the battery is recharged, it may generate heat, which causes skin and/or internal injuries. If the battery leaks, cause corrosion and/or disfigure your mouse. Do not let the battery discharge or perfect for extended periods of time. When the battery is recharged, it may generate heat, which causes skin and/or internal injuries. If the battery leaks, cause corrosion and/or disfigure your mouse. Do not let the battery discharge or perfect for extended periods of time.
Rechargeable Laser Presenter Air Mouse

User Manual

Brief

The Rechargeable Laser Presenter Air Mouse PM001FL is a multi-functional hand-held pointing device for computer. It is able to transform the space movement of the human hand in the air into an accurate displacement of the screen pointer. Its motion detection technology relies on a multi-axis motion detector encapsulated in the device that analyzes the rotation of the entire orbit. In conclusion, this is the perfect device to control the accurate movement of a screen pointer in an intuitive way. Limiting within 10 meters communication range, users can control the mouse pointer infinitely shown in the screen in freely roaming once they push the start button. Besides, it is equipped with a switch to control the laser pointer. In the air, the laser presenter allows to work under DISCONTINUOUS mode or under DISCONTINUOUS mode. Under DISCONTINUOUS mode, the user needs to hold the Device button of the laser presenter to control the cursor. Using the CONTINUOUS mode, the user does not need to hold the Device button for controlling the cursor. In the air, the laser presenter allows to work under DISCONTINUOUS mode or under CONTINUOUS mode.

Install (Figure Description)

In the air

The pointing apparatus is able to control the laser pointer corresponding to the instructions of the user. If the user is held in the air, the motion detection of the position of the start button shown in the air will stop. The user should press the start button and then release it. While the pointer is used at any time, you should charge battery to be full (about 30 to 60 minutes), then you should press and release the connection button to start the laser pointer. If the stop button is pressed, the charging LED changes to a red color after the rechargeable battery is full.

Operations

In the air

The pointing apparatus is able to control the laser pointer corresponding to the instructions of the user. If the user is held in the air, the motion detection of the position of the start button shown in the air will stop. The user should press the start button and then release it. While the pointer is used at any time, you should charge battery to be full (about 30 to 60 minutes), then you should press and release the connection button to start the laser pointer. If the stop button is pressed, the charging LED changes to a red color after the rechargeable battery is full.

Special Operations

1. On Off and Recharge

When the user holds the Stop button and the cursor starts drifting (drifting while the mouse is at rest), the positioning operation should be performed. When the user presses the Stop button at rest and the display is red, then the pen button and then release the LED button for 5 seconds. After releasing both buttons, you can test the cursor of laser pointer freely in order to check whether the positioning stops. If the cursor of laser pointer still drifts, you should repeatedly process the procedure suggested above till the positioning stops finally.

2. Switch between DISCONTINUOUS or CONTINUOUS mode for cursor control

The laser presenter air mouse can be set to a DISCONTINUOUS mode or a CONTINUOUS mode. Under DISCONTINUOUS mode, the user needs to hold the Device button of the laser pointer to control the cursor. Using the CONTINUOUS mode, the user does not need to hold the Device button for controlling the cursor.

3. Rechargeable battery charge

While the rechargeable battery voltage is low, the battery shows a red color, the charge LED changes to a green color after the rechargeable battery is full.

4. Setup for Cursor Size & Color

While Laser Presenter Air Mouse acts as presenter function in the presentation occasion, in order to achieve the most obvious indication capability of the mouse pointer. OmniMotion Technology specifically offers an application package which can switch to different cursor sizes and colors. If you are satisfied with the background color of your power point file, you can download the program from the website http://www.ommo.com.tw to select. Download for CursorSetup program. While you run the program to option the variable cursor size and color in Microsoft Windows, you won’t need the laser pen with red point. (While Microsoft Office PowerPoint is used for your presentation, you can press the Right button of mouse to point the ‘Arrow Option’ of Cursor Option). Then select ‘View’ to show laser always display, please study the Microsoft Office PowerPoint user guide for detailed operation.

5. Use of Dongle

Note 1: When the Dongle is removed from computer or Computer is turned off, you should also turn off laser presenter new battery power. Note 2: Laser presenter not use when laser is on.
