# A/V Splitter --- AVS-104

Broadcast Audio and Video to Multiple Remote Monitors Up To 300m/1000ft over a Single CAT5

CAT5 A/V Splitter can simultaneously transmits the audio and video signals to up to 8 or 16 remote monitors, so the viewers not only see what is being broadcasted but also hear it.

The system consists of 4/8-outport Local Unit at the computer's/player's site and Dual Remote Unit for the remote monitors. Those two units are connected via a single CAT5 cable to reduce the cable clutter significantly and the pure hardware design makes the installation easy, simply plug and play without any software installation.

All the remote monitors can be located at different places at the distance of up to 300m/1000ft away from the computer/player to provide the flexibility on setting up the ideal digital signage you need.

Dual Remote Unit

Model No.: AVS-R1/ AVS-R3

4/8-outport Local Unit

Model No.: AVS-104L/108L

Features:

- High-quality 4/ 8 PORT multimedia broadcasting in real time

- Transmitting A/V signals over 300m/1000ft via CAT5 cable from the computer/player

- Dual Remote Unit allowing you connect 2 monitors at the same location easily and save the cost

- UTP/STP CAT5 cabling to reduce cable clutter significantly

- Plug and play without any software installation

- Cascadable
